Cool the Burn, Not the Patient.

Most burn protocols call for and allow for the cooling of burns for burns less than 20% TBSA. That means hands, face, arms, legs, chest, etc. Water-Jel offers EMR’s, EMT’s and Paramedics a superior pre-moistened Burn Dressing that provides fast pain relief, helps stop the burning process, helps reduce burn progression and protects against contamination. They Cool the Burn, Not the Patient.

Powerful Pain Relief

It is truly remarkable what so many people say about the soothing pain relief of Water-Jel Burn Dressings. They instantly cool and soothe on contact. And because Water-Jel burn dressings do not quickly evaporate like water or saline-soaked dressings, they provide controlled cooling for the skin, without over cooling the patient or lowering the core body temperature. Water-Jel stays on the burn without the need for re-wetting is not necessary – making them easy to use and cost effective.

Water-Jel conforms to most EMS burn protocols to Stop the Burning Process and to provide cooling – especially for burns <25% TBSA

Just the Facts

Water Jel...
- Is 96% water.
- Cools and soothes on contact, dissipating heat from the burn.
- It is not a greasy ointment or lotion.
- Does not increase the risk of hypothermia.
- Will not interfere with debridement.
- It does not contain lidocaine, but provides significant pain relief

Special Hand Burn and Facial Burn dressings help first response personnel manage these very painful and complex burns. See reverse side for details.

*All burn kits contain instruction card, 3” roll gauze and scissors.

**Water-Jel Burn Dressings**

Water-Jel Burn Dressings are made with a scientifically formulated cooling gel and utilize medical-grade nonwoven pads. They are non-adherent so they will not stick to burn injuries. The dressings are soaked in a water-based / water-soluble, bacteriostatic and biodegradable gel and sterilized to ensure a contamination-free atmosphere for emergency treatment of burns. With Water-Jel Burn Dressings, it takes no special training to give fast and effective emergency burn care for any type of burn injury. All Water-Jel Burn Dressings have a 5-year shelf life from date of manufacture.

Each dressing has a Total Body Surface Area (TBSA) icon that indicates approximate surface area covered with the use of that dressing.

**Hand Burn Dressings**

Take care of serious hand burns – they are very painful and often difficult to manage. Water-Jel’s cooling Hand Burn Dressings soothe the pain for fast and effective burn care. Specially designed tabs weave between fingers and wrap the thumb and hand to deliver cooling to all hand and finger surfaces.

**Facial Burn Dressings**

Facial Burns are critical burn injuries, very painful and difficult to manage. Water-Jel’s cooling Facial Burn Dressings soothe the pain for fast and effective burn care. Specially designed dressing features pre-cut holes for the eyes, nose and mouth to deliver cooling to the entire face, for head, ears, chin and neck.
